## Oshkosh Airport Products Names Commercial Emergency Equipment Its New Dealer for ARFF and Snow Products in Canada

Commercial Emergency Equipment is thrilled to be announced as the Canadian dealer for Oshkosh Airport Products, an Oshkosh Corporation company. Oshkosh is revered as a leading designer and manufacturer of the world's toughest specialty trucks; Airport Rescue and Firefighting (ARFF) equipment and snow removal equipment. Oshkosh is likely best known in Canada for the most innovative ARFF vehicle in the world: The Striker.

Oshkosh has been producing ARFF vehicles for 60+ years with over 5,000 vehicles delivered. They have also been producing and delivering snow removal equipment since the 1950's when they were awarded their first major defense contract of 1,000 of their WT-2206 snow removal trucks.

Commercial Emergency Equipment is a division of Commercial Truck Equipment (Comtruck), which was founded in 1947 in Vancouver, BC. Comtruck is Western Canada's largest supplier of truck equipment and boasts a tradition of "best in class" product knowledge, customer support, and technical expertise. Its product expertise includes snow and ice trucks, crane trucks, towing and recovery vehicles, utility trucks, dump and gravel trucks, as well as truck hydraulic systems.

We are dedicated to helping carry on the Oshkosh legacy throughout Canada with the industry's largest network of full-service locations. "I am very excited to represent the world's leading ARFF and snow removal equipment," says Morgan MacKay, General Manager "We are confident our branch network is committed to support Oshkosh Airport Product's important product line in Canada."

Commercial is renowned throughout Canada for our professional engineers, designers, heavy-duty mechanics and EVT's, welders and fabricators, as well as knowledgeable and experienced parts people and customer service representatives. Our team understands the critical mission of our customers and we are committed to their safety and the reliability and performance of the equipment we deliver, support, and service.

We look forward to this venture, meeting existing customers of Oshkosh Airport Products, and introducing the best ARFF and snow removal equipment to new customers across Canada.
